Clinical study for anti cellulite garments pants and vest

The clinical studies were made into a well known Romanian aesthetic clinic named Bio Terra Med under supervising of specialist plastic surgeon Dr. Dumitru Totir specialist in plastic surgery and physiotherapist Ionela Avriganu .

Bio Terra Med was founded in 2001 and offers a large gamma of medical services and diagnosis at a high level of quality and professionalism.

Study was realized for 8 weeks with a sample of 12 persons that were kept under observation daily.

Is well-known that cellulite evolve in time and after pregnancy extend , leading to obesity cellulite! The factors that favor the apparel of cellulite are:

1. Poor nutrition with excess of: animal fat, sweets, pasta, sodas, canned and food additives;
2. Lack of regulate exercise;
3. Hormonal disorders (puberty, pills, contraceptive, pregnancy, menopause);
4. Stress (causes a hormonal hyper secretion);
5. Coffee consumption, alcohol and tobacco.

The result of the clinical study was as follow:

Regarding anti cellulite vest the immediate results were:

- an improved silhouette immediately, thanks to the extremely elastic compressed fabric;
- a continuous massage resulting from the molded elastic fabric and the body's movement stimulated capillary microcirculation, facilitating the drainage of retained liquids that are the cause of cellulite;
- an excellent support for the breast;
- an excellent support for dorsal and lumbar Para vertebral muscles, eliminating the back pain while wearing the vest;
- worn throughout the last period of 8 weeks, in active moments, reduces in percent of 75% appearance of orange peel from the abdomen;

Regarding anti cellulite pants the immediate results were:

- a continuous massage resulting from the molded elastic fabric and the body's movement stimulated capillary microcirculation, facilitating the drainage of retained liquids that are the cause of cellulite;
- facilitate the venous and lymphatic circulation
- for persons who suffer of per arthritis of the hip it reduces substantially the pain by supporting the pelvic muscles belt
- short and midi pants worn throughout the all period , in active moments, reduces in percent of 80% the appearance of orange peel.

Here below some pictures of women cellulite affected at the beginning and at the end of the treatment with CzSalus anti-cellulite slimming vest & pants plus anti cellulite creams and following up a diet as suggested in this pages.

Thanks to new formula added with silver nano particles the garment is:

- **antibacterial**, it is effective against the bacteria responsible for body odour.
- **Antistatic dissipative** - it has an antistatic dissipative action thanks to the insuperable electrical conduction of the silver
- **antistress action** - it favours anti-stress action against sensation of fatigue
- **heat regulator** - thanks to the insuperable electrical conduction of the silver, it favours the circulation of the blood to oxygenate the cells, keeping the whole body at the same temperature
- **shielding** - it reflects infrared sun rays, keeping the body cooler in the sunlight
- **radiating power** - therefore body heat is maintained for a long time when is cold
- **long lasting** - it keeps its properties even after numerous washes

As a conclusion of the study **Doctor Dumitru Totir** recommend also:

- for a better results that persons who wears anti cellulite garments also to have a equilibrate diet and to drink minimum of 2 liter of liquids per day.
- The garments can also be wearing after liposuction surgery as a part of recovery at 1 or 2 weeks after the surgery.
